# ADD A PATIENT

1 Select the + icon

**2** Enter patient's First Name, Last Name and Sex (required). then tap Register Patient.

TAKING TOTAL BODY IMAGES
1 Select your patient, then tap the 🧍 icon

2 Tap **Serial Total Body Photography**

3 Use Baseline ghost as a guide and take images

4 If you need to image a specific body part, simply select the Body Part and start imaging

Tips on Taking Images:

1. Use the Baseline Ghost
2. Have the body part fit into the template
3. Ensure the camera is **parallel** during imaging and **NOT** tilted/angled
4. Tap the screen to focus before imaging

Imaging Soles │ Have the patient keep their feet close together while they:

- Lay flat on a bed or
- Sit on a chair with their legs facing outwards resting on a stool or
- Kneel backwards on a stable chair

Patient Positioning: Position the patient approximately 30 cm (1 ft) away from the backdrop to minimize shadowing.
LESION DETECTION

**1** Select your patient, then tap the 🧍 icon
2 Select the Body Part

3 Select Image
4 Tap the 📍 icon

5 Select Lesions of Concern and press **Next** to add dermoscopic images

DERMOSCOPIC IMAGING
